More safety with “CLIX” – the new **VACUETTE® CLIX** Safety Hypodermic Needle

Dear **VACUETTE®** Customer,

We are delighted to be able to introduce to you the latest product innovation from Greiner Bio-One. The **VACUETTE® CLIX** Safety Hypodermic Needle is equipped with a safety shield and can be used with both syringes and specimen collection systems via the Luer connector.

The **VACUETTE® CLIX** Safety Hypodermic Needle is ideal for use with the **HOLDEX®** tube holder.

Product advantages

- The safety mechanism is an integral part of the device
- Single-handed activation
- Audible “CLIX” indicates safety activation
- Double lock to fix the needle
- For use with syringes or blood collection devices

We are organising a webinar to present the **VACUETTE®** CLIX Safety Hypodermic Needle. This webinar will provide you with extensive information about how it works, what it can be used for and the advantages of our new product, as well as about our product portfolio and competitor products.

Two times are available. We look forward to seeing you at one of them, and request that you register using the link next to your preferred time:

October 22nd, 2015	8.30 – 9.00 am (MESZ/CEST)	Registration
	3.00 – 3.30 pm (MESZ/CEST)	Registration

If you have any further questions after our webinar on the **VACUETTE®** CLIX Safety Hypodermic Needle we would be delighted to answer them directly or via e-mail to faq.pa@gbo.com.

If you are selling our products outside Europe, please contact your export manager responsible for product registrations.

Yours sincerely,
Greiner Bio-One
